Commercial Design Using Autodesk Revit 2018 Daniel John Stine 2017-05 Commercial Design Using Autodesk Revit 2018 is designed for the architectural student using Revit 2018. The intent is to provide you with a well-rounded knowledge of tools and techniques for use in both school and industry. This text takes a project based approach to learning Revit's architectural tools in which you develop a three story office building. Each book also includes access to nearly 100 video tutorials designed to further help you master Autodesk Revit. General building codes and industry standard conventions are covered in a way that is applicable to the current exercise. The first two chapters are intended to get you familiar with the user interface and many of the common menus and tools of Revit 2018. A small office is created in chapter two to show you just how easy it is to get started using Autodesk Revit. By the end of chapter two you will be excited and prepared to take on a much larger project. Throughout the rest of the book you develop a three story office building. The drawings start with the floor plans and develop all the way to photo-realistic renderings like the one on the cover of this book. In these chapters many of the architectural tools and features of Revit 2018 are covered in greater detail.

Teaching the Chinese Language Remotely Shijuan Liu 2022 This edited book brings together global perspectives and case studies from five continents to provide an international picture of teaching Chinese remotely. It consists of 15 original chapters by 21 authors from 10 countries. Addressing both practice and research, these chapters collectively offer a comprehensive view of how Chinese language courses worldwide were urgently moved to fully online during the early stages of the Covid-19 pandemic. This edited volume reports fresh and first-hand experiences of Chinese language instructors and students in different countries as well as their perceptions of issues regarding remote teaching and learning in an emergency situation. The book will be of interest to Chinese language teachers and students, as well as scholars with a focus on language education and online teaching and learning more broadly. Shijuan Liu is Associate Professor in the Foreign Languages Department at Indiana University of Pennsylvania, USA. She has over 20 years teaching experience and numerous publications on language education and technology integration, and has received multiple teaching awards and research grants.

The Public Understanding of Assessment John Gardner 2017-10-02 Assessment of educational achievement, whether by traditional examinations or by teachers in schools, attracts considerable public interest, particularly when it is associated with 'high stakes' outcomes such as university entry or selection for employment. When the individual's results do not chime with their or their teachers' expectations, doubts creep in about the process of assessment that has arrived at this result. However, educational assessment is made up of many layers of complexity, which are not always clear to the general public, including teachers, students, and parents, and which are not easily understood outside of the expert assessment community. These layers may be organized in highly co-dependent relationships that include reliability, validity, human judgment, and errors, and the uses and interpretations of the various types of assessment. No-one could reasonably argue that the principles and complexities of educational assessment should be core learning in public education, but there is a growing realization that trust in the UK assessment system is under some threat as the media and others sensationalize or politicize any problems that arise each year. This book offers the first comprehensive overview of how the general public is considered to perceive and understand a wide variety of aspects of educational assessment, and how this understanding may be improved. This book was originally published as a special issue of the Oxford Review of Education.
