Conflict Management and Dialogue in Higher Education Nancy T. Watson 2017-10-01 This book addresses an important topic - Conflict, mediation and dialogue. Conflicts are a part of life. Although many people assume conflicts are negative and, therefore, should be avoided, conflict is truly neutral. The engagement in conflict is what can be constructive or destructive. There are many positive outcomes experienced when a conflict is well managed, hence the critical role of this book. For instance, most change is driven by some level of conflict. You must learn, grow and develop effective conflict management skills as a way to manage change. Thus, the conflicts we deal with in our personal lives and in the workplace are essential to our development and our organizations' healthy development. However, if managed poorly, some conflicts can escalate to the point that they can destroy individuals or organizations. As illustrated in this book, the key to managing conflicts is to understand conflicts; expect conflicts, and manage conflicts before they escalate into destructive or costly loss of personnel, diminished climate or lead to lawsuits. The book provides one of the growing and recognized methods of dealing with conflicts - mediation and dialogue. The contents of this book reflect areas of importance addressed in mediation training: alternative dispute resolution practices, conflict management intervention options, models of thinking about conflict, the mediation format, and the skill set needed by a strong conflict management and mediator. Readers are challenged to reflect upon their biases and beliefs that may negatively impact the mediation process.

How to Prevent Special Education Litigation Regina Umpstead 2015 It is essential that today's educators and school leaders are more informed about the legal rights and entitlements of students with disabilities. This resource provides eight easy-to-implement lesson plans on special education law that require no legal knowledge and can be facilitated by school principals, special education directors, teachers, or university instructors. In short one-hour sessions, participants learn by engaging in practical activities instead of only passive reading about the law. All of the lessons utilize actual situations that have led to expensive litigation and each includes the following sections: Introduction for Facilitators; Materials Needed; Background, Purpose, and Objectives of the Lesson; Hook; Activity; Questions for Conversation; Test Your Knowledge; and Additional Resources. This one-of-a-kind book will help schools and districts reduce the time and energy devoted to dealing with violations of the law, resolving parental complaints, correcting errors by school employees, and more. Book Features: A focus on important special education legal issues occurring in schools today. Field-tested lesson plans that can be adopted by schools nationwide because they are based on federal law. Everything needed to teach the lessons, including materials, scripts, interactive activities, and discussion questions. Measurable objectives and assessments to ensure the participants have learned the intended content of the lesson. "School boards spend far too much money on special education litigation—funds that could better be used to provide educational services to children. This book provides a workable framework for school administrators to give their staff the knowledge needed to make legally-correct decisions and avoid costly litigation." —Allan Osborne, Former Principal, Snug Harbor Community School, Quincy, MA

Peer Mediation: Citizenship And Social Inclusion Revisited Cremin, Hilary 2007-09-01 "This book is a must for those who, like me, believe passionately both in the power of peer mediation...and in the urgency of spreading good practice in a society like ours, which is desperately searching for ways to be inclusive and at peace with itself." Tim Brighouse, former Commissioner for London Schools "As the challenges facing young people grow so do the array of support mechanisms to help them. During my time as a Member of Parliament and as a Minister I saw many of the ideas and initiatives which were tackling this issue. I am attracted to the idea of peer mediation mainly because it goes beyond the question of how can we protect and help children when they have a difficulty, and develops those increasingly important social and emotional skills in all children." Estelle Morris, Former Secretary of State, DfES Why use peer mediation? What are the factors that influence its failure or success? Peer mediation as a form of conflict resolution is growing in popularity and usage, particularly within education. The number of schools using this method has increased, with many schools in the UK now using mediation to settle disputes both in school, and in the wider community. Based on the author's extensive work on peer mediation, the book provides a thorough account of theory and practice relating to an approach that can enable young people to resolve their own disputes "and those of their peers. The author shows how peer mediation can be embraced by schools to strengthen student voice, behaviour management, active citizenship and inclusion, as well as how it can be neglected and fail to achieve these aims. Drawing on case studies of peer mediation in schools, the book offers an analysis of the work that has been carried out in this area. It revisits key debates in education such as citizenship, social inclusion, student voice and behaviour management in order to begin to address the questions surrounding this method of conflict resolution. Peer Mediation is key reading for primary and secondary

school teachers, educational professionals, academics, policy-makers and those with an interest in practical peace making.

Peace Education in a Postmodern World Ian M. Harris 2013-12-16 This special issue of the Peabody Journal of Education provides a comprehensive overview of the latest developments in peace education reform. School reforms based upon principles of peace education have in common a belief in the power of peace to create a positive learning climate in schools and to address the problems of violence in the broader culture. A peace education strategy for improving school productivity rests upon three main assumptions: 1. Violence contributes to the poor performance of many students. 2. Adults in school settings need to address problems created by violence in order for schools to improve. 3. Anxieties that make it hard for students to master traditional subject matter can best be addressed by a comprehensive peace education strategy that makes school a safe place to learn and provides students with knowledge about alternative nonviolent ways to resolve conflicts. Peace building reforms go beyond responding to immediate forms of violence that may be overwhelming students and teachers to promoting positive images of peace through the study of nonviolence. Written by established experts in the field of peace education from six different countries, this collection of articles not only represents a wide variety of peace education practices from different corners of the globe, but it also represents varying academic perspectives. Educators can play a key role in helping human societies progress toward more sustainable ways of living by implementing peacemaking, peacekeeping, and peace building strategies in school programs. Peace education reforms point to a new way of thinking about schools as vehicles for promoting a peace culture through insights offered by nonviolent theory.

Quality Public Management George Beam 2001 George Beam's Quality Public Management shows how public sector organizations can be managed to maximize performance and citizen satisfaction. Beam builds on the theories and practices of W. Edwards Deming, Joseph M. Juran, and Armand V. Quality Public Management demonstrates how the principles of Quality management can be successfully implemented in all major aspects of public organizations such as Processes (recruitment, training, compensation, promotion, budget and policy making, and procurement), Structures (teams, partnerships, and networks), and Personnel (line workers, middle management, and executive officers).
