Charter School Report Card Shawgi Tell 2016-04-01 What is a charter school? Where do they come from? Who promotes them, and why? What are they supposed to do? Are they the silver bullet to the ills plaguing the American public education system? This book provides a comprehensive and accessible overview and analysis of charter schools and their many dimensions. It shows that charter schools as a whole lower the quality of education through the privatization and marketization of education. The final chapter provides readers with a way toward rethinking and remaking education in a way that is consistent with modern requirements. Society and its members need a fully funded high quality public education system open to all and controlled by a public authority.

Repowering Communities Prashant Vaze 2014-01-14 Energy policy is at a crossroads. Attempts to meet targets for carbon emissions, energy security and affordable energy for vulnerable households are all on a trajectory to failure. Aggressive ambitions to roll out huge off-shore wind, nuclear and clean coal plants are proposed, but without any clear plans on how funds will be mobilized, or transmission and distribution infrastructure developed. In this book Prashant Vaze and Stephen Tindale ask politicians and regulators to consider a different path. Using abundant examples of small scale local solutions Repowering Communities examines how cities, communities and local authorities from across Europe and North America have driven reductions in energy use and rolled out small scale, community level solutions. Among the issues examined are the drivers behind behavioural change, the methods used to secure necessary investment and what government and civil society can do to foster such action on a wide scale. Based on extensive first-hand research and drawing on the latest global energy data the authors provide essential information and inspiration for readers who wish to drive the policies that encourage community-level energy development.

The Autism Puzzle Brita Belli 2012-03-27 The alarming spike in autism in recent years has sent doctors and parents on a search for answers. And while many controversies have erupted around the issue, none have gotten us any closer to a definitive explanation, and many key concerns remain unexplored. Moving beyond the distractions of the vaccine debate, *The Autism Puzzle* is the first book to address the compelling evidence that it is the pairing of environmental exposures with genetic susceptibilities that may be impacting the brain development of children. Journalist Brita Belli brings us into the lives of three families with autistic children, each with different ideas about autism, as she explores the possible causes. She interprets for readers compelling evidence that environmental toxins—including common exposures from chemicals mounting in our everyday lives—may be sparking this disorder in vulnerable children. Belli calls for an end to the use of hazardous materials—like toxic flame retardants used in electronics and furniture, which have been banned elsewhere--insisting that we cannot afford to experiment with our children. *The Autism*

Puzzle puts a human face on the families caught in between the debates, and offers a refreshingly balanced perspective.

Made in the USA Vaclav Smil 2015-08-21 An argument that America's economy needs a strong and innovative manufacturing sector and the jobs it creates. "There's no author whose books I look forward to more than Vaclav Smil." —Bill Gates In Made in the USA, Vaclav Smil powerfully rebuts the notion that manufacturing is a relic of predigital history and that the loss of American manufacturing is a desirable evolutionary step toward a pure service economy. Smil argues that no advanced economy can prosper without a strong, innovative manufacturing sector and the jobs it creates. Smil explains how manufacturing became a fundamental force behind America's economic, strategic, and social dominance. He describes American manufacturing's rapid rise at the end of the nineteenth century, its consolidation and modernization between the two world wars, its role as an enabler of mass consumption after 1945, and its recent decline. Some economists argue that shipping low-value jobs overseas matters little because the high-value work remains in the United States. But, asks Smil, do we want a society that consists of a small population of workers doing high-value-added work and masses of unemployed? Smil assesses various suggestions for solving America's manufacturing crisis, including lowering corporate tax rates, promoting research and development, and improving public education. Will America act to preserve and reinvigorate its manufacturing? It is crucial to our social and economic well-being; but, Smil warns, the odds are no better than even.

Basics in Adolescent Medicine Tomas J Silber 2014-03-21 This practical manual reviews salient topics in Adolescent Medicine. The volume is practitioner-centered, focusing on the symptoms that bring a teenager to the clinician. Every chapter begins with a very brief clinical vignette, highlighting the patient's chief complaint or primary issue of concern. The handbook is divided into five primary sections: (1) Well Adolescent Care to include chapters such as the Annual Physical and Immunizations in Adolescence; (2) Common Problems of Adolescence such as Acne and Low Back Pain; (3) Reproductive Health Care issues such as Menstrual Disorders and Teen Pregnancy/Options Counseling; (4) Urgent Care matters including Acute Chest Pain and Scrotal Pathology: Pain and Masses; and finally, (5) Special Considerations to include chapters such as Cyberbullying and Sexting and Tobacco Use and Cessation Counseling. Chapters follow a uniform format with vignette as described above, followed by multiple choice questions designed to test the readers knowledge. Salient features related to the chapter topic follow, including relevant clinical " pearls " such as history, physical exam, laboratory and diagnostic studies and treatment strategies. For each chapter, issues that are unique to managing illness in adolescents are highlighted to distinguish them from adults and younger children. When applicable, a broad differential diagnosis is provided to help guide the reader. Easy to read tables are included to highlight and clearly summarize key aspects of the topic and the chapters end with answers to the Board-Style questions presented at the start.
