Structural Elements Design Manual Trevor Draycott 2009 This book is the structural engineer's "companion volume" to the four Eurocodes on the structural use of timber, concrete, masonry and steelwork. For the student at higher technician or first degree level it provides a single source of information on the behaviour and practical design of the main elements of the building structure. With plenty of worked examples and diagrams, it is a useful textbook not only for students of structural and civil engineering, but also for those on courses in related subjects such as architecture, building and surveying whose studies include the design of structural elements.

Ebook: Survey of Operating Systems Jane Holcombe 2014-10-16 McGraw-Hill is proud to introduce the fourth edition of Jane and Charles Holcombe's, Survey of Operating Systems. This title provides an introduction to the most widely used desktop operating systems

(including Windows 8, Mac OS, and Linux) and includes a more visual approach with more illustrations and a more interactive approach with hands-on activities to result in students building a successful foundation for IT success.

ComputerCare's Laptop Repair Workbook Ashok Liu 2012-06 A practical guide to the maintenance and repair of laptop computers, including three hundred repair cases and thirteen diagnostic flowcharts.

Competing to Win Dr. Ted Marra 2015-01-01 1. What does it take to build and maintain a truly enduring and continuously successful business - one that stands the test of time, turbulence and change and despite all that has continued to set the standard for performance and excellence by which other organizations are measured? 2. What really makes your organization unique? What really distinguishes us in the minds of our customers or other key stakeholders - makes us stand out in a way that motivates customers to want to do business or have a relationship with us rather than a competitor? What are those most important factors which form the foundation of that uniqueness and our competitiveness as an organization? 3. Have you and your leadership team described your business model in a clear and understandable manner that any employee could grasp? Have you examined each component of that business model to identify the value it adds to the long-term future success of your business? This includes the leadership team itself, culture, values, beliefs, core shared purpose, renewal (integration of innovation, adaptation and learning), principles of engagement (sustainability, governance, corporate social responsibility), and vision. What are your conclusions? What actions should you now take? These questions and over 150 more equally stimulating and change-provoking questions are raised and explored within this concise text. As senior executives, you always have many areas where you can focus your attention-paths along which you can guide your organization to enable it to ultimately reach its full competitive potential. Guide your organization to its competitive potential by answering the questions within this text and by applying Dr. Ted Marra's approach to developing a working business model and crystal clear vision. Dr. Ted Marra has lived and worked in 37 countries during the past 40 years, helping over 155 organizations from virtually every industry and sector. Here is his summary of this first book in the Wisdom Chronicles Series: This book is really about focus. Forget all the latest theories. To a large extent, the "secrets" to success have never really been secrets. It's often about getting back to basics-doing the right things for the business and doing them right. This is the essence of what Peter Drucker considers "leadership." In addition to my hands-on experience, I have read all the thought leaders: Hamel, Porter, Kotter, Collins and more. I have been in conferences all over the world, interacting with the likes of Juran and Welch as well as many others. All of that, plus my own reflections, and distilling it down has been a lifetime pursuit. This book contains that distillation of my observations providing the reader with what I believe are truly the vital few keys to long-term organizational success - competitiveness and profitable growth and overall higher performance across the board.

Build Your Own .NET Language and Compiler Edward G. Nilges 2004-05-10 \* Includes a complete QuickBasic compiler with source code. We cannot overstate that this is a huge marketing hook. Virtually every experienced programmer today started out with some version of Basic or QuickBasic and has at some point in their career wondered how it worked. The sheer nostalgia alone will generate sales. The idea of having QuickBasic for them to play with (or let their kids play with) will generate sales. \* One of a kind book - nothing else comes close to this book. \* Demystifies compiler technology for ordinary programmers - this is a subject usually covered by academic books in a manner too advanced for most developers. This book is pitched at a level accessible to all but beginners. \* Teaches skills used in many other types of programming from creation of macro/scripting languages to file parsing.

Structural Elements Design Manual: Working with Eurocodes Trevor Draycott 2009-10-26 Structural Elements Design Manual: Working With Eurocodes is the structural engineers 'companion volume' to the four Eurocodes on the structural use of timber, concrete, masonry and steelwork. For the student at higher technician or first degree level it provides a single source of information on the behaviour and practical design of the main elements of the building structure. With plenty of worked examples and diagrams, it is a useful textbook not only for students of structural and civil engineering, but also for those on courses in related subjects such as architecture, building and surveying whose studies include the design of structural elements. Trevor Draycott the former Buildings and Standards Manager with Lancashire County Council's Department of Property Services has 50 years experience in the construction industry. For 20 years he was also an associate lecturer in structures at Lancashire Polytechnic, now the University of Central Lancashire in Preston. For many years he served on the Institution of Structural Engineers, North West Branch, professional interview panel and the North West regional committee of the Timber Research and Development Association. Peter Bullman worked for Felix J Samuely and Partners, Taylor Woodrow Construction and Building Design Partnership before joining Bolton Institute, now the University of Bolton, as a lecturer in structural engineering. He has taught structural design on higher technician, degree and postgraduate courses, and has run courses to prepare engineers for the IStructE Chartered Membership examination.
