You could buy lead In Defence Of Dogs John Ws Bradshaw or acquire it as soon as feasible. You could quickly download this In Defence Of Dogs John Ws Bradshaw after getting deal. So, subsequent to you require the book swiftly, you can straight acquire it. Its for that reason entirely easy and hence fats, isnt it? You have to favor to in this aerate

The Congregationalism of the Last Three Hundred Years, as Seen in Its Literature Henry Martyn Dexter 1880

Dogs in the Leisure Experience Neil Carr 2014-11-19 This book explores the social and cultural constructions and debates of what are dogs and what is leisure. It looks at how working dogs play a significant role in leisure experiences such as ensuring the safety of air transport, and considers the differing roles and changing acceptance of dogs' involvement in sport. Within the setting of the animal welfare and sentience debates, it examines the leisure needs of dogs and their owners. Providing an original contribution to our understanding of dogs as both participants and objects in the leisure experience, this book is a useful resource for researchers in leisure, hospitality and tourism.

Soldier's Best Friend Stephen Paul Stewart 2016-05-01 Military working dogs are silently winning the war against the world's deadliest insurgents; day after day saving soldiers' lives in the most dangerous countries on the planet. Many have been rescue animals, neglected or mistreated by their owners before being given a new lease of life on the front line. From the featureless plains of Helmand and Kandahar to military bases in Germany, army dog teams work day and night to keep us safe but, until recently, their courage and sacrifice has not been fully understood or appreciated. Award-winning journalist Stephen Paul Stewart employs in-depth interviews together with years of research and frontline reportage to tell their gripping and emotional stories for the first time. 'A fascinating insight into a little-known subject, A Soldier's Best Friend is a moving and engrossing read.' — Niall Edworthy

Virginia Woolf: Writing the World Pamela L. Caughie 2015-06-12 Woolf Writing the World addresses such themes as the creation of worlds through literary writing, Woolf's reception as a world writer, world wars and the centenary of the First World War, and natural worlds in Woolf's writings. The selected papers represent the major themes of the conference as well as a diverse range of contributors from around the world and from different positions in and outside the university. The contents include familiar voices from past conferences--e.g., Judith Allen, Eleanor McNeese, Elisa Kay Sparks--and well-known scholars who have contributed less frequently, if at all, to past Selected Papers--e.g., Susan Stanford Friedman, Steven Putzel, Michael Tratner--as well as new voices of younger scholars, students, and independent scholars. The volume is divided into four themed sections. The first and longest section, War and Peace, is framed by Mark Hussey's keynote roundtable, "War and Violence," and Maud Ellmann's keynote address, "Death in the Air: Virginia Woolf and Sylvia Townsend Warner in World War II." The second section, World Writer(s), includes papers that read the Woolfs in a global context. The papers in Animal and Natural Worlds bring recent developments in ecocriticism and post-humanist studies to analysis of Woolf's writing of human and nonhuman worlds. Finally, Writing and Worldmaking addresses various aspects of genre, style, and composition. Madelyn Detloff's closing essay, "The Precarity of 'Civilization' in Woolf's Creative Worldmaking," brings us back to international and cultural conflicts in our own day, reminding us, as Detloff says, why Woolf still matters today.

L'incredibile intelligenza del gatto John Bradshaw 2016-10-27 Uno dei maggiori esperti mondiali del comportamento animale ci mostra la sorprendente natura dei gatti Il gatto è l'animale domestico più diffuso al mondo. Per ogni cane, considerato "il migliore amico dell'uomo", ci sono tre gatti. Eppure oggi questi amabili felini si trovano ad affrontare sfide senza precedenti nella loro convivenza con gli esseri umani: dagli ambientalisti, che li considerano una minaccia per la fauna selvatica, agli altri gatti, con cui si trovano a competere per il territorio, per finire coi proprietari, animati da buone intenzioni, e i veterinari con idee sbagliate su ciò di cui hanno davvero bisogno. Al gatto non serve la nostra simpatia, ma la nostra comprensione. L'incredibile intelligenza del gatto ci offre per la prima volta un quadro davvero scientifico, eppure profondamente affettuoso, su uno dei compagni più stretti eppure più enigmatici dell'uomo. John Bradshaw è un biologo che ha fondato e dirige l'Anthrozoology Institute, di fama mondiale, che ha sede presso l'Università di Bristol. Ha studiato il comportamento dei gatti domestici e dei loro proprietari per oltre 25 anni, ed è autore di numerosi articoli e studi scientifici in merito.

A Catalogue of the Bradshaw Collection of Irish Books in the University Library Cambridge Charles Sayle 2014-09-04 A 1916 three-volume catalogue of over 8,000 books and pamphlets from or about Ireland, printed between 1600 and 1900.

The Dog Linda P. Case 2013-03-25 Dogs are a part of nearly 40 percent of United States households. With this in mind, author Linda P. Case has written the definitive textbook on dogs and their care. Completely updated and revised, the second edition of The Dog covers four areas of compelling interest: the bond between dogs and humans, canine behavior, canine health and disease, and canine nutrition. Aiming to enhance the human-dog bond, author Case uses clear, understandable writing to explain selective breeding, training principles, solution to common behavior problems, diet and nutrition, and preventative health care. Case liberally uses distinctive figures and tables, current references plus suggested readings, and a thorough glossary to aid in comprehension. More in-depth than most dog books, The Dog will prove to be an indispensable tool for undergraduate companion animal courses, veterinary technician courses, and dog care/training courses. In addition, it will serve as a valuable resource for professional breeders, trainers, exhibitors, and veterinary clinicians.

Das andere Ende der Leine Patricia B. McConnell 2011-10-25 Dieses Buch wirft eine revolutionäre, neue Perspektive auf unseren Umgang mit Hunden: Es beleuchtet unser Verhalten im Vergleich zu dem der Hunde! Als Doktorin der Zoologie, Tierverhaltenstherapeutin und Hundetrainerin mit mehr als zwanzig Jahren Praxiserfahrung betrachtet Patricia McConnell uns Menschen augenzwinkernd wie eine interessante Spezies von Säugetieren. Fundiert, aber höchst unterhaltsam beschreibt sie, wie wir uns in Gegenwart von Hunden verhalten, wie die Hunde unser Verhalten interpretieren (oder missverstehen)

könnten und wie wir am besten mit unseren vierbeinigen Freunden umgehen, um das Beste aus ihnen herauszuholen. Beginnen Sie, Hundeverhalten aus der Sicht eines Hundes zu betrachten und Sie werden verstehen, warum vieles, das wie Ungehorsam Ihres Hundes aussieht, einfach ein großes Missverständnis ist. Denn wir sind Primaten, die Hunde Caniden - und sprechen folglich andere Sprachen! Hier erfahren Sie: - Wie Ihr Hund eher auf Zuruf kommt, wenn Sie sich weniger wie ein Affe und mehr wie ein Hund benehmen - Warum der Rat, "Dominanz" über den Hund erlangen zu müssen, Sie in Schwierigkeiten bringen kann - Welche Persönlichkeitstypen Menschen und Hunden gemeinsam sind und warum die meisten Hunde lieber mit großzügigen Herrschern als mit "Möchtegern-Alphas" zusammenleben - ... und vieles mehr! Zahlreiche kleine Geschichten, Erlebnisse und amüsante Begebenheiten am Rande machen dieses Buch zu einer Fundgrube für Aha-Erlebnisse, bei denen höchstes Lesevergnügen garantiert ist. So viel Spaß kann Verhaltensforschung machen!

En la mente de un gato John Bradshaw 2015-05-21 ¿Qué es lo que piensan los gatos? Esta es una pregunta intrigante que nos hemos planteado desde que los seres humanos convivimos con ellos. En este asombroso libro, John Bradshaw responde a la cuestión en toda su verdadera extensión y nos ofrece las claves que nos permitirán desvelar los misterios que ocultan estos fascinantes felinos.

Through A Vet's Eyes Dr Sean Wensley 2022-04-28 One of the Financial Times' Best Summer Books of 2022 'A compelling account of the trials, tribulations and triumphs of life as a vet - and a lesson to us all on how we should treat the animals with which we share our lives.' - Stephen Moss, naturalist and author Dr Sean Wensley is an award-winning vet and lifelong naturalist who has contributed to animal welfare and conservation projects all over the world. His debut book is about how we can choose a better life for animals, from the chickens we eat to the pets we keep. As our societies become more urbanised, we are further removed from the reality of where and how our food is produced. Surveys suggest that nearly 1 in 4 UK adults don't know that bacon comes from pigs. On the opposite end of the spectrum, the humanisation of our pets is a risk to their welfare; with over 60% of UK dogs being overweight or obese, we are effectively killing them with kindness. Through A Vet's Eyes seeks to redress this imbalance so that we see all animals as thinking, feeling beings not dissimilar to ourselves. As he takes us through the years in which he trained to become a vet, and set against a backdrop of inspiring natural spectacles, Dr Wensley shares his first-hand experience of how animals are treated and used for our benefit. He interrogates the different levels of welfare afforded to them and reveals how we the general consumer can reduce our animal welfare footprint through the choices we make every day.

Thinking about Animals in the Age of the Anthropocene Morten Tønnessen 2016-04-13 Thinking about Animals in the Age of the Anthropocene makes connections between the Anthropocene discourse and human-animal studies, thus facilitating further interdisciplinary work on the topic of animals in the Anthropocene.

Die kalte Schulter und der warme Händedruck Allan & Barbara Pease 2016-11-18 Was verraten meine Gesten über mich? Wie kann ich die körperlichen Signale anderer deuten? Warum kommunizieren Männer und Frauen auch nonverbal vollkommen verschieden? Diesen Fragen gehen Allan & Barbara Pease auf den Grund. Dabei beobachten sie nicht nur ganz alltägliche Phänomene der Körpersprache, sondern präsentieren auch Beispiele aus ihren Seminaren. Ein Muss für jeden Pease-Fan.

Cat Sense John Bradshaw 2013-08-15 From John Bradshaw, one of the world's leading experts on animal behaviour, and the author of the Sunday Times Bestseller, In Defence of Dogs, Cat Sense is a scientific portrait of the true, surprising nature of cats. Worshipped as gods, feared as demonic servants, seen as both wild opportunists and beloved companions, cats often seem as unfathomable, enigmatic and magical to us today as they did in ancient times. They have lived with humans for at least ten thousand years (far earlier than the reign of the Pharaohs), and today are the most popular pet in the world. That they now outnumber the dog, man's 'best friend', by three to one, is small wonder: at once affectionate and self-reliant, they seem to be perfectly suited to our busy 21st Century lifestyles. Yet cats still think like the wild scavengers and hunters from which they are descended - and to which they can quickly revert. Today, they face unprecedented challenges in their life with humans: from conservationists who cast them as a threat to wildlife; from other cats who they compete for territory with; and from good-intentioned owners and vets with misconceptions of what they require. Cats need not so much our sympathy, but our understanding, if they are to continue to enjoy our companionship. The recent surge in feline science - with John Bradshaw at the forefront - means we are now better equipped to understand them than ever before. Cat Sense offers us for the first time a true picture of one of humanity's closest and most enigmatic companions. Praise for In Defence of Dogs: 'The most fantastic book, a revelation' Observer 'Essential reading' Daily Telegraph 'Nothing less than a manifesto for a new understanding' Guardian 'A case grounded in kindness and science ... Authoritative, wise and rather moving' Independent 'A wonderful, reassuring, and encouraging book' Literary Review 'A wonderfully informative, passionate book' Economist John Bradshaw is a biologist who founded and directs the world-renowned Anthrozoology Institute, based at the University of Bristol. He has been studying the behaviour of domestic cats and their owners for over 25 years, and is the author of many scientific articles, research papers and reviews. He is also the author of the Sunday Times bestseller, In Defence of Dogs.

Das Kind in uns John Bradshaw 2013-05-02 Auf dem Weg zum Ursprung meiner Probleme Freundschaft mit mir selbst schließen - die eigene Kindheit aufarbeiten mit dem bekannten Familien-Therapeut und Bestseller-Autor John Bradshaw Begegnen Sie Ihrem inneren Kind mit Freundlichkeit und Akzeptanz. Denn wer sehnt sich nicht danach, ganz angenommen und wirklich geliebt zu werden? Danach, Beziehungen erfüllender und glücklicher zu gestalten und Konflikte problemlos lösen zu können? Der Schlüssel dafür liegt in den unverarbeiteten, oft unbewussten Erfahrungen aus der eigenen Kindheit, die die Wurzel vieler unserer alltäglichen Probleme sind. Der bekannte Familien-Therapeut John Bradshaw zeigt in seinem Selbsthilfe-Ratgeber, warum das verletzte Kind in uns unser Leben heute bestimmt, wie wir zu ihm zurückkehren, prägende Erfahrungen verarbeiten, mit unserer Kindheit abschließen und zu einem erfüllten und befreiten Leben finden können. Das Ziel ist es, das innere Kind für sich zurückzugewinnen und es zu beschützen, sodass die Verletzungen von früher uns heute nicht mehr schaden können. So kann jeder Mensch sein volles Potenzial entfalten, neue ungeahnte Kraftquellen in sich entdecken und endlich authentisch leben. Ein Ratgeber, der jeden Suchenden auf dem Weg zum inneren Kind mithilfe von zahlreichen kompetenten Ratschlägen, Selbsthilfe-Übungen, Fragebögen und Selbstauswertungen ganz praktisch begleitet.

Eine Geschichte des Universums in 100 Sternen Florian Freistetter 2019-09-23 Vom Urknall über den Stern von Bethlehem zur GAIA-Mission: Florian Freistetter nimmt uns in 100 Sternengeschichten mit auf eine Reise durch den Kosmos. Weißt du, wie viel Sternlein stehen? Mehr, als man sich vorstellen kann – und alle erzählen sie eine Geschichte über das Universum. Dank Gamma Draconis wissen wir, dass die Erde sich um ihre Achse dreht, und 61 Cygni hat uns verraten, wie groß der Kosmos ist. Die Sterne nehmen uns mit auf die Suche nach außerirdischem Leben, sie erklären uns, wie schwarze Löcher funktionieren und warum die Dinosaurier ausgestorben sind. Sie zeigen, wie wir durch den Weltraum reisen und andere Planeten besiedeln können. Florian Freistetter erzählt die Geschichte des Universums anhand von 100 Sternen – und erschließt in 100 kurzweiligen Kapiteln nicht weniger als die Vergangenheit und die Zukunft des Kosmos.

La vie secrète des chats John Bradshaw 2014-09-15T00:00:00-04:00 Vénérés en tant que dieux, craints en tant que serviteurs du Diable, considérés à la fois comme des opportunistes sans vergogne et des compagnons bien-aimés, les chats nous paraissent souvent aujourd'hui aussi incompréhensibles, mystérieux et géniaux que dans les temps anciens. Ils vivent avec les humains depuis au moins dix mille ans (bien avant le règne des pharaons) et ils représentent de nos jours l'animal domestique le plus répandu. Il n'y a rien d'étonnant à ce qu'ils soient trois fois plus nombreux que le chien, le «meilleur ami» de l'homme: à la fois affectueux et indépendants, ils semblent parfaitement adaptés à notre style de vie effréné du XXIe siècle. Pourtant, les chats pensent encore comme les charognards et les chasseurs sauvages dont ils sont les descendants — et dont ils peuvent rapidement retrouver la nature. De nos jours, ils se trouvent confrontés à des défis sans précédent dans leurs rapports avec les humains: de la part des défenseurs de l'environnement qui les voient comme une menace pour la faune; de la part des autres chats à qui ils font concurrence sur un même territoire; et de la part de propriétaires bien intentionnés et de vétérinaires qui se font de fausses idées sur ce qui leur est nécessaire. S'ils doivent continuer à vivre agréablement avec nous, ils n'ont pas tant besoin de notre affection que de notre compréhension. Grâce aux récents progrès dans le domaine de l'étude des félins — dont John Bradshaw est un des pionniers — nous sommes mieux que jamais auparavant en mesure de les comprendre. Ce livre nous présente pour la première fois un véritable portrait de l'un des compagnons les plus proches et les plus mystérieux de l'humanité.

The APBC Book of Companion Animal Behaviour David Appleby 2016-04-01 The Association of Pet Behaviour Counsellors has been established for over twenty years and their experience and understanding of this new, and developing, science of ethology is the basis of the book. Experienced animal behaviour counsellors provide the most up-to-date account of the science of animal psychology for all pet owners, while providing a practical approach for all veterinarians who treat small animals. Dogs, cats and rabbits are the animals most commonly treated for behavioural problems and the book focuses on the problems that affect these companion animals. Exploring the psychology of a pet's relationship with its owner, and with each other, leading writers from Sarah Heath and Anne McBride to Inga MacKellar identify the problems all vets will be asked about and provide practical solutions to them. Bringing together a variety of expert opinions and the most up-to-date research The APBC Book of Companion Animal Behaviour will help resolve a cat's anti-social behaviour and explain why a dog acts like its wild wolf ancestors. Groundbreaking essays on problem behaviour look at how learning and emotions governs animal behaviour while outlining the best way to understand: The foundations of canine behaviour How pets and children interact Behaviour problems in domestic rabbits Rage Syndrome in dogs Problems specific to ageing pets. This guide compiles the insights and experience of authors at the forefront of this expanding science to provide expert and professional perspectives that will enhance the relationship between a pet and its owner. Pet behavior, whether dogs, cats or rabbits, is affected by their ethology (the science of animal behavior) while it is also important to understand how learning and emotional response can govern their actions. Animal experts propose solutions to problem behavior in ground-breaking essays, as well as providing guidance on the relationship between pets and children (including the arrival of a new baby), "rage" syndrome in dogs, how to rehabilitate rescue dogs and cats, plus advice on legal and welfare issues. The Association of Pet Behaviour Counsellors has been established for almost thirty years to study why pets act as they do. The APBC's experience and understanding of this new, and developing, science of ethology is the basis for this book. Experienced animal behaviour counsellors provide the most up-to-date account of the science of animal psychology in the relationship between a pet and its owner, while providing a practical approach for veterinarians who treat small animals. Dogs, cats and rabbits are the animals most commonly treated for behavioural problems and the book focuses on the problems that affect these companion animals. Exploring the psychology of a pet's relationship with its owner, and with each other, leading writers from Julie Bedford and Anne McBride to Inga MacKellar identify the problems all vets will be asked about and provide practical solutions to them. Groundbreaking essays on problem behaviour look at how learning and emotional response governs animal behaviour while outlining the best way to understand: The foundations of canine behaviour, How pets and children interact, How to rehabilitate rescue dogs and cats, Rage Syndrome in dogs Bringing together a variety of expert opinions and the most up-to-date research The APBC Book of Companion Animal Behaviour will help resolve a cat's anti-social behaviour and explain why a dog acts like its wild wolf ancestors.

Justice of the Peace and Local Government Review 1869
Hunde unter Wasser Seth Casteel 2012-11-09 Fesselnde Bilder aus dem Unterwasserleben von Hunden. Der Bildband "Hunde unter Wasser" zeigt Hunde, wie sie noch nie zuvor porträtiert wurden. Der preisgekrönte Fotograf Seth Casteel verfügt über eine besondere Technik, mit der er Vierbeiner vom Grunde eines Schwimmbades aus fotografieren kann, während diese ins Wasser eintauchen. Die Bilder, die dabei entstehen, bieten spektakuläre Impressionen, der Anblick der Hunde erinnert teilweise an Urzeittiere, Fische, tauchende Babys, Vom Labrador, über den Spaniel bis hin zum Border Collie hat Seth Casteel fast jede gängige Hunderasse mit dieser neuartigen Technik abgelichtet. Die 80 außergewöhnlichen, großformatigen Portraits zeigen eine noch nie gesehene Darstellung des ältesten Freundes des Menschen. Der Bildband ist das perfekte Geschenk für jeden Hundefreund und jeden, der sich für Fotografie begeistert.

Dog World 1944

The Dog Ádám Miklósi 2018-04-10 An accessible and richly illustrated introduction to the natural history of dogs—from evolution, anatomy, cognition, and behavior to the relationship between dogs and humans As one of the oldest domesticated species, selectively bred over millennia to possess specific behaviors and physical characteristics, the dog enjoys a unique relationship with humans. More than any other animal, dogs are attuned to human behavior and emotions, and accordingly play a range of roles in society, from police and military work to sensory and emotional support. Selective breeding has led to the development of more than three hundred breeds that, despite vast differences, still belong to a single species, *Canis familiaris*. The Dog is an accessible, richly illustrated, and comprehensive introduction to the fascinating natural history and scientific understanding of this beloved species. Ádám Miklósi, a leading authority on dogs, provides an appealing overview of dogs' evolution and ecology; anatomy and biology; behavior and society; sensing, thinking, and personality; and connections to humans. Illustrated with some 250 color photographs, The Dog begins with an introductory overview followed by an exploration of the dog's prehistoric origins, including current research about where and when canine domestication first began. The book proceeds to examine dogs' biology and behavior, paying particular attention to the physiological and psychological aspects of the ways dogs see, hear, and smell, and how they communicate with other dogs and with humans. The book also describes how dogs learn about their physical and social environments and the ways they form attachments to humans. The book ends with a section showcasing a

select number of dog breeds to illustrate their amazing physical variety. Beautifully designed and filled with surprising facts and insights, this book will delight anyone who loves dogs and wants to understand them better.

Ein Grk-Abenteuer Joshua Doder 2014-04 Freundschaft; Tier; Abenteuer; Mittelstufe; Klassenlektüre.

In Defence of Dogs John Bradshaw 2011-07-11 A dog is not for Christmas. This is. John Bradshaw, one of the world's leading dog experts, brings us a compelling insight into what dogs would ask us for, if only they knew how. The dog has been mankind's faithful companion for tens of thousands of years, yet today finds itself in crisis throughout the western world. Until just over a hundred years ago, most dogs worked for their living, and each of the many breeds had become well suited, over countless generations, to the task for which they were bred. Now, in their purely domestic roles we fail to understand their needs. And it is time that someone stood up for dogdom: not the caricature of the wolf in a dog suit, ready to dominate its unsuspecting owner at the first sign of weakness, not the trophy animal that collects rosettes and kudos for its breeder, but the real dog, the pet that just wants to be one of the family and enjoy life. Biologists now know far more about what really makes dogs tick than they did twenty years ago, but this new understanding has been slow to percolate through to owners, and has not yet made enough of a difference to the lives of the dogs themselves. This book is here to set the record straight.

Wir streicheln und wir essen sie Hal Herzog 2012 Unser Verhältnis zu Tieren ist paradox. Wir halten Hunde als Gefährten, züchten Rinder, weil sie uns schmecken, und führen an Affen Laborversuche durch. Doch warum schleppen Mopsbesitzer ihre Lieblinge zum Hunde-Yoga - und machen sich anschliessend bedenkenlos über ein Kalbsschnitzel her? Der Anthrozoologe Hal Herzog zeigt, wieso wir welche Tiere mögen, warum wir unbedingt an den Nutzen von Delfintherapie glauben wollen - und sich Hund und Herrchen häufig so ähnlich sehen. Ein Parforceritt durch das ethische Minenfeld der Mensch-Tier-Beziehungen. Nach der Lektüre dieses Buchs denken Sie nicht nur anders über Tiere, sondern auch über sich selbst. 'Ein hinreissendes Buch.' Julia Koch, Der Spiegel 'Eine faszinierende und ausgesprochen Unterhaltsame Entdeckungsreise in eine elementare Dimension unseres Lebens.' Steven Pinker Hal Herzog ist Mitbegründer der Anthrozoologie und führender Experte für Mensch-Tier-Beziehungen. Er ist Professor für Psychologie an der Western Carolina University und lebt zusammen mit seiner Frau Mary Jean und ihrer Katze Tilly in den Great Smoky Mountains.

The Behaviour of the Domestic Cat John W. S. Bradshaw 2012 The behaviour of domesticated animals is a subject of great importance to students of animal behaviour and veterinary medicine, as well as interested pet owners. This new edition of the 1992 book fully updates the original chapters with new research from the past two decades, while also including two new chapters covering behavioural disorders due to pathologies and from misdirected natural behaviour. "Fully updated throughout" New chapters" Written by well-renowned feline behaviour experts The book aims to present a readable overview of the behaviour of the domestic cat, adopting both a mechanistic and functional approach. The first half of the book is mainly concerned with physiological, developmental and psychological aspects; this includes chapters on domestication, the development of the senses, learning, communication and feeding behaviour. To provide a comprehensive resource on the subject, the second half of the book looks at social behaviour, hunting and predation, cat-human interactions and welfare. Also essential reading for cat breeders and researchers of domestic animal behaviour, this new textbook is the quintessential source of cat behaviour information.

Die Welt aus Katzensicht John Bradshaw 2015-03-05 Zwischen den wildlebenden Katzen-Vorfahren und der heutigen Partnerschaft von Katze und Mensch liegt eine wechselvolle Entwicklung, die der Verhaltensforschers Dr. John Bradshaw beschreibt. Dabei verbindet er neue und erstaunliche Erkenntnisse aus der Verhaltensforschung mit eigenen Erfahrungen und einem persönlichen Appell für den artgerechten Umgang mit den Samtpfoten.

Cat Sense John Bradshaw 2014-08-07 Why do cats get stuck up trees? What makes them purr? Why do they kill? Do they really like us? What are they thinking? John Bradshaw, one of the world's leading experts on animal behaviour, overturns many of the myths surrounding cats to reveal the true nature of our most enigmatic companions: what makes them tick, how they relate to humans (and each other), and what they really need to make them happy. 'You could buy a dozen books by the many cat whisperers, cat gurus and cat therapists, but their accumulated wisdom would probably not help you understand your cats as well as Cat Sense.' Tom Cox, Observer 'Friendly and engaging, packed with excellent cat facts.' Steven Poole, Guardian 'What makes Bradshaw's book so valuable is his positive thinking. How can we make the cat less anxious? How can we help?' Lynne Truss, The Times 'Bradshaw wants us to be better owners, and draws on the latest research - much of it is his own - to show us how.' James McConnachie, Sunday Times 'A must-read for cat owners.' The Lady
