[How to Choose a Prime Lens: Expanded Edition](#) Shawn M. Tomlinson 2016-04-28 Photographer and writer Shawn M. Tomlinson, author of the Photo Curmudgeon column and books, explains in detail the usefulness of prime lenses for photographers who typically only use zoom lenses in this expanded edition. He considers the uses of prime lenses, the advantages as well as the disadvantages, and provides a conversational approach to making the move to this type of lens. Prime lenses are sharper and have less distortion, less chromatic aberration and brighter maximum apertures than zooms, he reports. Tomlinson examines the most common prime lenses, how they are used and what a photographer can expect to pay. "In this short guide, I give you some pointers about what prime lenses do, what type you may need for your particular photographic vision and how to choose what you need," Tomlinson writes in the book.

In *The Nikon Autofocus System, 2nd Edition*, photographer Mike Hagen, author of the bestselling *The Nikon Creative Lighting System*, takes his deep knowledge of Nikon technology and concentrates on its focus features. In this book, which covers all current Nikon DSLR models (including the D5 and D500), Hagen fully explains how Nikon autofocus works, including detailed discussions of all the autofocus modules, drive systems, and camera buttons and menus. He also devotes an entire chapter to explore how focus works with Nikon's lenses.

Armed with this general knowledge, Hagen then dives deep and offers camera setups, settings, and best practices for specific field techniques that address the photographic genres that are notoriously challenging for focus: action and sports (indoor and outdoor), wildlife (including birds in flight), and macro photography. He also covers genres such as portrait, landscape, underwater, low-light, and street photography. Hagen not only advises on the best ways to set up the camera and focus systems, he gives helpful tips and tricks throughout the book.

*The Nikon Autofocus System* also covers:

- Live view autofocus methods and settings
- Achieving great focus in video
- AF tracking
- AF shooting styles, such as back-button AF and shutter-release AF
- HDR, panoramas, and other techniques for shooting with a tripod
- An entire chapter on additional terms and techniques, such as hyperfocal distance, calibrating lenses, focus and flash photography, and more
