**Evaluating the Use of a Postpartum Hemorrhage Simulation as a Teaching Strategy in an Undergraduate Nursing Program** Pat DiGiacomo 2017 A recurring theme in the literature is that simulation is a positive teaching strategy when compared to other methods of instruction and produces positive student outcomes (Jefferies, 2016). Simulation provides educators a way to reproduce a clinical teaching experience in a safe, supportive learning environment. The purpose of this quantitative research study was to determine whether an obstetrical simulation educational experience is an effective strategy for educating undergraduate nursing students in the management of a postpartum hemorrhage. A quasi-experimental study using a pre-test and post-test design was employed in a Women's Health Course and Pediatrics course over one semester. A single convenience sample (N=81) of junior baccalaureate nursing students was used for this study. There were 41 students in the control group and 40 in the experimental group. Both the control and experimental groups received the traditional didactic session, case study, skills lab instruction, and clinical. In addition, the experimental group received the postpartum simulation. This simulation study tested the differences in knowledge, satisfaction, and confidence level between junior nursing students who did and did not participate in the simulation. There were three instruments used during this study; a pre-test/post-test for knowledge acquisition, the National League for Nursing (NLN) (2005) student satisfaction and confidence level survey, and the Creighton Competency Evaluation Instrument (C-CEI) (Todd, Manz, Hawkins, Parsons, & Hercinger, 2008). The pre-test/post-test measured the knowledge acquisition obtained from the didactic session. NLN (2005) student satisfaction and confidence level survey measured students' satisfaction and confidence level from either the interactive skills lab sessions or the simulation. The C-CEI tool measured the students' performance during the simulation. There were four categories: assessment, communication, clinical judgment, and patient safety that the researcher measured the students' performance during the simulation. Data for the knowledge acquisition, revealed both the experimental and control groups significantly increased between the pre-test and the post-test. The post-test showed statistically significant differences between groups, with the control group outperforming the experimental group. As such, the data demonstrate that the simulation did not have a significant effect on knowledge. Data from the NLN (2005) student satisfaction and confidence level survey were analyzed using a two group MANOVA. Although the results of the MANOVA were not significant, as a follow up analysis, the individual questions were used as the dependent variables in a MANOVA. When the individual questions were used as the dependent variables in a MANOVA, the experimental group performed significantly better in two out of the five questions on student satisfaction and five out of the nine questions on student self-confidence. There was a strong positive correlation between satisfaction with current learning and self-confidence. Data for the students' performance were analyzed using the C-CEI tool. A perfect score on the C-CEI instrument was 14 points, 100%. The overall group average was 8.1 points or 58%. Of the four sections in the C-CEI tool, the lowest mean was Communication (0.5185), followed by Patient Safety (mean = 0.5333). Although student groups were able to communicate with the patient effectively 67% of the time, none of the simulation groups provided an organized report to the healthcare provider with minimal prompting. During the postpartum simulation, 33% of the students administered medications safely. The wrong dosage and incorrect technique were seen in 67% of the simulations. Communication and safe medication practice are essential to ensuring patient safety; it is important that faculty prepare nursing graduates to provide safe care. Even though there were limitations to this study, a convenience sample at one public university, the findings are informative and have implications for future teaching and learning strategies. The results of this study add to the body of knowledge that supports the use of simulation as a teaching strategy in undergraduate nursing education.

**Essentials for Nursing Practice - E-Book** Patricia A. Potter 2018-03-12 Get a solid foundation in essential nursing principles, concepts, and skills! Essentials for Nursing Practice, 9th Edition combines everything you need from your fundamentals course and streamlines it into a format that's perfect for busy nursing students. The ninth edition retains many classic features, including chapter case studies, procedural guidelines, and special considerations for various age groups, along with new content including a chapter on Complementary and Alternative Therapies, interactive clinical case studies on Evolve, a new Reflective Learning section, and QSEN activities to encourage active learning. Thoroughly reviewed by nursing clinical experts and educators, this new edition ensures you learn nursing Essentials with the most accurate, up-to-date, and easy-to-understand book on the market. Progressive case studies are introduced at the beginning of the chapter and are then used to tie together the care plan, concept map, and clinical decision-making exercises. Focused Patient Assessment tables include actual questions to help you learn how to effectively phrase questions to patients as well as target physical assessment techniques. Nursing skills at the end of each chapter feature full-bleed coloring on the edge of the page to make them easy to locate. Safety guidelines for nursing skills sections precede each skills section to help you focus on safe and effective skills performance. Detailed care plans in the text and on Evolve demonstrate the application of the 5-step nursing process to individual patient problems to help you understand how a plan is developed and how to evaluate care. Unexpected outcomes and related interventions for skills alert you to possible problems and appropriate nursing action. Patient Teaching boxes help you plan effective teaching by first identifying an outcome, then developing strategies on how to teach, and finally, implementing measures to evaluate learning. Care of the Older Adult boxes highlight key aspects of nursing assessment and care for this growing population. Key points neatly summarize the most important content for each chapter to help you review and evaluate learning. Evidence-Based Practice boxes include a PICO question, summary of the results of a research study, and a F description of how the study has affected nursing practice — in every chapter. Patient-Centered Care boxes address racial and ethnic diversity along with the cultural differences that impact socioeconomic status, values, geography, and religion. 65 Skills and procedural guidelines provide clear, step-by-step instructions for providing safe nursing care. 5-step nursing process provides a consistent framework for clinical chapters. Concept maps visually demonstrate planning care for patients with multiple diagnoses. NOC outcomes, NIC interventions, and NANDA diagnoses are incorporated in care plans to reflect the standard used by institutions nationwide.

**Pharmacology for the Primary Care Provider - E-Book** Marilyn Winterton Edmunds 2008-09-16 Written by and for nurse practitioners, this practical textbook focuses on what primary care providers need to learn and practice drug therapy. With an overall emphasis on patient teaching and health promotion, you will learn how to provide effective patient teaching about medications and how to gain patient compliance. Drug coverage focuses on "key drugs rather than "prototype drugs, so you can find important information about the most commonly used drugs rather than the first drug in each class. You will also find discussions on the legal and professional issues unique to nurse practitioners and other primary care providers. The 3rd edition also features an expanded emphasis on established clinical practice guidelines and evidence-based practice, plus two new chapters that cover drugs for ADHD and drugs for dementia. UNIQUE! Written specifically for nurse practitioners with an overall emphasis on patient teaching and health promotion. UNIQUE! Covers specific topics such as prescriptive authority, role implementation, and writing prescriptions. Presents comprehensive coverage of the drugs most commonly prescribed in – and the issues most relevant to – primary care practice. UNIQUE! Identifies the Top 200 drugs in chapter openers with a special icon and covers them in-depth to familiarize you with the most important, need-to-know drug information. Uses a consistent heading scheme for each prototype drug discussion to make it easier to learn and understand key concepts. Includes an introductory chapter on "Design and Implementation of Patient Education that highlights content on patient teaching and compliance. Includes specific "Patient Education sections in each drug chapter. Provides extensive coverage of drug therapy for special populations to alert you to special considerations based on age, pregnancy, race and other factors. A separate chapter on "Complementary and Alternative Therapies discusses the available complementary and alternative modalities, including detailed information on actions,

uses, and interactions of commonly used herbs. Drug Overview tables at the beginning of each chapter outline the classifications of drugs discussed and provide a handy reference of drug classes and subclasses, generic names, and trade names. Clinical Alerts highlight essential information that primary care providers must remember in order to avoid serious problems, including cautions for prescribing, information about drug interactions, or warnings about particularly ominous adverse effects. An entire unit covers drugs for health promotion to introduce you to drugs commonly seen in outpatient primary care settings and to prepare you for practice in a society increasingly focused on health promotion and disease prevention. Includes separate chapters on Immunizations and Biologicals, Weight Management, Smoking Cessation, Vitamins and Minerals, Over-the-Counter Medications, and Complementary and Alternative Therapies.

Books 2 through 6 are divided into sections that contain one or more directories devoted to individual programs in a particular field. Book 6 contains more than 19,000 programs of study in 147 disciplines of business, education, health, information studies, law, and social work.

**Evaluation of Safe Medication Administration Knowledge of Pre-licensure Baccalaureate Senior Nursing Students** Lisa Kay Murphree 2018 Medication errors are known to occur at unacceptable rates with potential serious clinical and financial harm [Institute of Medicine (IOM), 2006; Lahue et al., 2012]. Safe medication administration in today's complex health care system requires effort from multiple disciplines, of which nurses play an essential role. Nurse educators have the responsibility to prepare students to begin their first nursing job after graduation with the ability to practice safe nursing care, including the essential component of accurate medication administration. Based on a theoretical framework of cognitive learning theories, this study used a pretest-posttest quasi-experimental approach to investigate the degree to which two teaching strategies: senior-level preceptorships and a researcher-developed safe medication administration clinical workbook, would increase student knowledge of safe medication administration. Student knowledge was assessed using the Safe Medication Administration (SAM) Scale (Ryan, 2007). Data were collected from 28 senior nursing students and analysis was carried out using independent-sample t tests on pretest and posttest data comparing students in their usual critical care preceptorship (control group) with students using the clinical workbook in their usual critical care preceptorship (experimental group). Self-confidence data were also collected using a modified NLN Student Satisfaction and Self-Confidence in Learning Questionnaire, SSSCL-SAM. Use of the workbook increased learning satisfaction and self-confidence, but not SAM knowledge. An analysis was also carried out comparing data from the senior students in their fourth semester 72 hour critical care preceptorship plus workbook to the senior students in their fifth semester 150 hour capstone preceptorship plus workbook. Mixed design ANOVAs were used in these analyses. The fourth semester 72 hour critical care preceptorship plus workbook was more effective in increasing student SAM knowledge, learning satisfaction, and self-confidence than a 150 hour capstone preceptorship plus workbook. A researcher-developed checklist, the Survey of Use of Pharmacology Resources, was used to explore student pharmacology resource use.

**Dr. Nieca Goldberg's Complete Guide to Women's Health** Nieca Goldberg 2008-12-18 If you're a woman over thirty-five you probably have a lot of stress in your life—maybe even more than you realize. You may have a demanding job, family obligations, financial pressures, or a combination of all three. You're most likely low on energy, gaining weight, and not sleeping as well as you once did. The fact is: your body is changing. You see and feel it happening, but you don't know anymore what is normal and what is not. Your concern over your health is creating stress all by itself. And if you're like most women, you don't think your health care providers are giving you the help you need. In fact, traditional doctors may not even be aware of many diseases that present special problems in women. Dr. Nieca Goldberg knows what you're going through, because she has seen women dealing with these stressful bodily changes in her practice every day—and has experienced them firsthand. A renowned physician and pioneer in women's heart health, Dr. Goldberg is also a passionate advocate for doctor-patient communication. In this welcome book she'll give you a personal consultation so that you can understand the changes in your body, solve problems that plague women starting in their mid-thirties, and find the right doctor for optimal health care. Inside you'll find • the normal physical changes you can expect to experience at age thirty-five and after • treatments for over- and underactive thyroids and other hormone issues • the signs, symptoms, and management of type 1 and type 2 diabetes • facts on fertility, contraceptives, pregnancy, and menopause • information on good breast health, including preventive breast-cancer measures • a comprehensive heart-to-heart about your cardiovascular system • dealing with GERD, stomach ulcers, gallstones, IBS, IBD, and colon cancer • strategies for keeping bones strong, fending off arthritis, and coping with foot and back pain • the importance of diagnosing sleep apnea and saying good night to insomnia • revelations about the mind-body connection—countering stress and relieving depression • the ins and outs of medical exams—what to ask, and when to change doctors • an eating program that will help you achieve a healthy weight • an exercise program to strengthen bones, build muscle, and provide energy There is so much unreliable health care advice on the Internet and so many fad "cures" that it can be hard to know what matters and what doesn't. With warmth and encouragement, Dr. Nieca Goldberg gives you the solid information you need on the path to great health.

New features include prototype drug lists in the coverage of drug classes that receive expanded coverage, detailed patient teaching guidelines, expanded content in both the geriatric and pediatric chapters, a special icon identifying the Top 200 Drugs, and highlighted Clinical Alerts. Comprehensive coverage is provided of all drugs commonly prescribed and used in the primary care setting. Prototype drugs are presented first in each drug class, with expanded coverage of these agents. Clear explanations describe how each drug in a class differs from its prototype. Detailed information shows how to provide effective patient teaching, as well as how to gain patient compliance. Chapters focus on the practitioner's role in patient teaching, drug action, and drug therapy. Online Resources are provided at the end of each chapter. The Top 200 Drugs are described according to the number of U.S. prescriptions dispensed. Five new units improve the organization of material: Renal/Genitourinary Agents (Unit 8); Psychotropic Agents (Unit 11); Endocrine Agents (Unit 12); Female Reproductive Agents (Unit 13); and Health Promotion (Unit 15). New chapters examine over-the-counter medications, compliance and the therapeutic experiment, overview of the nervous system, substance abuse, treatment of common infections, weight management, and complementary and alternative treatments. Reorganized and redesigned format and headings are more consistent and easy to follow. Content has been expanded in the geriatric and pediatric "special populations" chapters (Ch. 6 and 7). More concise coverage of disease processes features clearer ties to the Mechanism of Action sections. 25 new figures have been added to the pathophysiology and Mechanisms of Action sections. A Table of Common Interactions is included on the inside of the back cover.

**Certified Nurse Educator (CNE) Review Manual, Second Edition** Ruth Wittmann-Price, PhD, CNS, RN, CNE 2013-05-22 "This is a treasure trove for those preparing for the CNE examination. For those adding certification to their goals list, this book is a must have."--Doody's Medical Reviews "I truly believe that your book made it possible for me to successfully complete the CNE exam! It truly is the only book you need to pass the CNE exam - I'm living proof! Thanks so much! I learned a lot from your book and intend to keep it on my desk for future reference!" -Sue Carroll, MSN, RN Sentara College of Health Sciences This is the only CNE review book for both novice and expert nurse educators that offers a systematic approach to preparing for the CNE Certification Exam. This concise Manual is aligned with the NLN's test blueprint to reflect not only requisite knowledge but also the percentages of content distribution in the new test plan. The book is organized into fifteen chapters that address the core content of topics outlined in the exam blueprint. Additionally, each chapter is organized into bite-size segments to facilitate ease of use. Chapters contain case studies, tips for test success, and critical thinking questions along with web links for accessing additional content on a particular topic. Review questions complete each chapter and a sample CNE test is provided. Three practice tests are also included along with an answer key and rationale for self-assessment. New to the Second Edition: Reflects shifting paradigms in nursing education Focuses on specific change theory, mentoring, incivility, curriculum design, and technology Revises content to reflect the new NLN CNL test plan Includes additional questions and teaching examples
