Guerrilla Networks Michael Goddard 2018-02-09 The radical youth movements of the 1960s and '70s gave rise to both militant political groups ranging from urban guerrilla groups to autonomist counterculture, as well as radical media, including radio, music, film, video, and television. This book is concerned with both of those tendencies considered as bifurcations of radical media ecologies in the 1970s. While some of the forms of media creativity and invention mapped here, such as militant film and video, pirate radio and guerrilla television, fit within conventional definitions of media, others, such as urban guerrilla groups and autonomous movements, do not. Nevertheless what was at stake in all these ventures was the use of available means of expression in order to produce transformative effects, and they were all in different ways responding to ideas and practices of guerrilla struggle and specifically of guerrilla media. This book examines these radical media ecologies as guerrilla networks, emphasising the proximity and inseparability of radical media and political practices.

Advances in Human Aspects of Transportation Neville A. Stanton 2016-07-26 This book discusses the latest advances in research and development, design, operation and analysis of transportation systems and their complementary infrastructures. It reports on both theories and case studies on road and rail, aviation and maritime transportation. The book covers a wealth of topics, from accident analysis, vehicle intelligent control, and human-error and safety issues to next-generation transportation systems, model-based design methods, simulation and training techniques, and many more. A special emphasis is given to smart technologies and automation in transport, as well as to user-centered, ergonomic and sustainable design of transport systems. The book, which is based on the AHFE 2016 International Conference on Human Factors in Transportation, held on July 27-31, 2016, in Walt Disney World®, Florida, USA, mainly addresses transportation system designers, industrial designers, human-computer interaction researchers, civil and control engineers, as well as vehicle system engineers. Moreover, it represents a timely source of information for transportation policy-makers and social scientists dealing with traffic safety, management, and sustainability issues in transport.
