Wer bin ich, wenn ich online bin Nicholas Carr 2011-12-22 Wie beeinflusst sie Körper und Geist? Heute schon gegoogelt? Im Durchschnitt sind die Deutschen etwa zweieinhalb Stunden täglich online. Neuesten Studien zufolge, so zeigt Bestsellerautor Experte Nicholas Carr, bewirkt bereits eine Onlinestunde am Tag erstaunliche neurologische Prägungen in unserem Gehirn. Was das Internet nach Informationen, sozialen Kontakten oder Unterhaltung durchforstet, verwendet, anders als beim Buch- oder Zeitunglesen, einen Großteil seiner geistigen Energie auf die Beherrschung des Mediums selbst. Und macht sich um die Inhalte buchstäblich, keinen Kopf. Die Folge: Im Internetzeitalter lesen wir oberflächlicher, lernen wir schlechter, erinnern wir uns schwächer denn je. Von den Anpassungsleistungen unseres Gehirns profitieren nicht wir, sondern die Konzerne, die mit Klickzahlen Kasse machen. In seinem neuen Buch verbindet Carr, zwanzig Jahre nach Entstehung des World Wide Web, seine medienkritische Bilanz mit einer erhellenden Zeitreise durch Philosophie-, Technologie- und Wissenschaftsgeschichte – von Sokrates' Skepsis gegenüber der Schrift, dem Menschen als Uhrwerk und Nietzsches Schreibmaschine bis zum User als Gegenstand aktueller Debatten und Studien. Und er vermittelt – jenseits von vagem Kulturpessimismus – anhand greifbarer Untersuchungen und Experimente, wie das Internet unser Denken verändert.

The Oxford Handbook of Assessment Policy and Practice in Music Education Timothy Brophy 2019-01-02 In the music classroom,

instructors who hope to receive aid are required to provide data on their classroom programs. Due to the lack of reliable, valid

large-scale assessments of student achievement in music, however, music educators in schools that accept funds face a complex

challenge in finding a way to measure student learning in their classrooms. From Australia to Taiwan to the Netherlands, music

teachers experience similar struggles in the quest for a definitive assessment resource that can be used by both music educators

and researchers. In this two-volume Handbook, contributors from across the globe come together to provide an authority on the

assessment, measurement, and evaluation of student learning in music. The Handbook's first volume emphasizes international

theoretical perspectives on music education assessment in the major world regions. This volume also looks at technical aspects of

measurement in music, and outlines situations where theoretical foundations can be applied to the development of tests in music

education. The Handbook's second volume offers a series of practical and US-focused approaches to music education assessment. Chapters

address assessment in different types of US classrooms; how to assess specific skills or requirements; and how assessment is

used in tertiary and music teacher education classrooms. Together, both volumes of The Oxford Handbook of Assessment in Music

Education pave the way forward for music educators and researchers in the field.

Mit der Endurance ins ewige Eis Ernest Shackleton 2015-11-09 Eine der berühmtesten Expeditionen ins Eismeer: Im Sommer 1914 stechen Sir Ernest Shackleton und seine Crew an Bord der "Endurance" in See. Das Ziel der Briten: den antarktischen Kontinent mit Hundeschlitten zu durchqueren. Doch bald schon steckt das Schiff im Packeis fest und zerbricht. Monatlang tragen die Besatzung auf einer Eisscholle durch die weiße Hölle, halb verhungert und erfroren. Shackleton ist entschlossen, seine Mannschaft lebendig nach Hause zu bringen. Und so bricht er auf, in einem winzigen Beiboot, mit fünf seiner Männer, um Hilfe zu holen. Es wird ein erbarmungsloser Wettlauf gegen den Tod.

State Mandated Summer Programs in Texas Heather A. Jones 2015 High stakes testing holds schools accountable for student performance. When students fail standardized tests, schools are held responsible for raising student scores. On May 31, 2014, 6th grade students in Texas took the STAAR English I End-of-Course exam. Of the over 350,000 students in the state who took the exam, 28 percent failed the combined reading and writing exam (Texas Education Agency, 2014). The state requires that school districts provide "accelerated instruction" for any student who fails "to perform satisfactorily on an end-of-course assessment instrument required for graduation" (HB5, 2013, p. 36). This accelerated instruction was offered by a large suburban school district in the form of a summer program in June of 2014 to prepare students for the re-test in July. Summer programs have been used by many districts to further students' coursework, and are now more frequently being used for test preparation. However, the research on the effectiveness of summer programs to increase test scores is inconclusive. Therefore, this study examined whether or not one summer-mandated program in Texas improved student test scores. It also compared the summer program curriculum and instructional strategies to the best practices of teaching reading and writing. The study answered this research question: Was there a significant difference between the July passing rates of the students who took the summer program (Group A) and the students who did not (Group B)? The data was analyzed using an analysis of covariance (ANCOVA) to compare the difference in scores between the attendees (N = 390) and the non-attendees (N = 257). Then the demographic subgroups were further analyzed using an ANCOVA to detect significant differences between and within the different groups. It was found that attendance in the summer program had a significant effect on students' retest scores. Through further demographic analysis, it also found that economically disadvantaged attendees and non-attendees had higher average scores as a group than the attendees as a whole. Additionally, the session a student attended (AM/PM) had a significant effect on their retest score. Through the comparison of the summer program curriculum to best practice, it was found that the program used some best practice strategies but the majority of the strategies fell under the category of test preparation. Interpretation of these results suggested that although the summer program appeared to help 60 percent of its attendees pass the retest, it was not effective for the 40 percent who failed the exam a second time. Also 47 percent of non-attendees passed the exam on their second try without attending the summer program. These results suggest that the summer program had limited educational significance.
