Killer Deals 10-12 Jenna Bennett Savannah Martin has always been a good girl, doing what was expected and fully expecting life to fall into place in its turn. But when her perfect husband turns out to be a lying, cheating slimeball—and bad in bed to boot—Savannah kicks the jerk to the curb and embarks on life on her own terms. With a new apartment, a new career, and a brand new outlook on life, she's all set to take the world by storm. If only the world would stop throwing her curveballs... UNFINISHED BUSINESS - #10 When Savannah wakes up alone on what is supposed to be her wedding day, she isn't sure what to think. Did her fiancé—bad-boy TBI agent Rafe Collier—decide he couldn't face being shackled to one woman for the rest of his life... or is something more sinister going on? Savannah's mother Margaret Anne, in Nashville for the nuptials, is certain she knows the truth: her future son-in-law has always been an ill-bred cad, and leaving his pregnant girlfriend practically at the altar clinches it. But the people who know Rafe aren't so sure. Wendell Craig with the TBI and Tamara Grimaldi with the Metro Nashville PD suspect foul play, and set out to prove it. Shortly, a dead woman turns up in Savannah's house. Rafe's son David goes missing from church camp on the Cumberland Plateau. And a shadowy figure from Rafe's past is stalking them all—a knife-wielding serial killer who likes to hurt women, and who has a score to settle. Now Savannah must solve the murder, find David, and avoid getting herself killed... or she can kiss her happy ending—and Rafe—goodbye. ADVERSE POSSESSION - #11 Savannah Martin's real estate career has been an uphill battle. As far as Savannah is concerned, her personal zenith was getting Aislynn Turner and Kylie Mitchell into their dream home, a Victorian cottage in the hip and happening historic district of East Nashville, last January. That was six months ago, and now the dream has turned sour. Someone is sending Aislynn and Kylie threatening letters, warning them to get out while they can. Aislynn is terrified and Kylie is ready to cut her losses. But finding a poison pen is only the beginning. When Kylie is attacked and the previous owner of the house is killed, the hunt is on for a murderer, and Savannah is determined to get to the bottom of what's going on before Aislynn and Kylie have to give up their dream home, and maybe each other, in the process. UNCERTAIN TERMS - #12 Savannah's husband, TBI agent Rafe Collier, is quiet in disguise and undercover, getting into the middle of a gang war. And since he wants to keep his pregnant wife out of harm's way, Savannah agrees to spend a couple of days under her mother's roof in her quaint and bucolic hometown of Sweetwater, Tennessee. But out of harm's way doesn't necessarily mean out of trouble. When her brother's receptionist asks Savannah's help in looking for her birth parents, Savannah is happy for the distraction, even when the search takes them to places she'd rather not go again. From Doctor Denise Seaver and the Tennessee Women's Prison, to St. Jerome's Hospital and then back to Sweetwater again, the hunt is on. But when the final denouement reveals lifelong deception and betrayal much too close to home, Savannah wonders whether knowing the truth really is better than blissful ignorance.

Econometric Methods with Applications in Business and Economics Christiaan Heij 2004-03-25 Nowadays applied work in business and economics requires a solid understanding of econometric methods to support decision-making. Combining a solid exposition of econometric methods with an application-oriented approach, this rigorous textbook provides students with a working understanding and hands-on experience of current econometrics. Taking a 'learning by doing' approach, it covers basic econometric methods (statistics, simple and multiple regression, nonlinear regression, maximum likelihood, and generalized method of moments), and addresses the creative process of model building with due attention to diagnostic testing and model improvement. Its last part is devoted to two major application areas: the econometrics of choice data (logit and probit, multinomial and ordered choice, truncated and censored data, and duration data) and the econometrics of time series data (univariate time series, trends, volatility, vector autoregressions, and a brief discussion of SUR models, panel data, and simultaneous equations). - Real-world text examples and practical exercise questions stimulate active learning and show how econometrics can solve practical questions in modern business and economic management. - Focuses on the core of econometrics, regression, and covers two major advanced topics, choice data with applications in marketing and micro-economics, and time series data with applications in finance and macro-economics. - Learning-support features include concise, manageable sections of text, frequent cross-references to related and background material, summaries, computational schemes, keyword lists, suggested further reading, exercise sets, and online data sets and solutions. - Derivations and theory exercises are clearly marked for students in advanced courses. This textbook is perfect for advanced undergraduate students, new graduate students, and applied researchers in econometrics, business, and economics, and for researchers in other fields that draw on modern applied econometrics.
