*NATFREQ Users Manual Wilfred D. Iwan 1984 This manual describes a computer program that has been developed to calculate natural frequencies and mode shapes of taut cables with attached masses and spring-mass combinations. The equations of motion are solved by an iterative technique allowing accurate calculation even for extremely high mode numbers. The approach has the advantages that it is fast, accurate, and can easily accommodate a variety of system configurations including bodies attached to the cable. This document covers the theory used in the development of the code. Line-by-line descriptions of both the input and output data are given, and several examples illustrating the use of the program are included. Some of the difficulties that may be encountered when running large, complex problems are discussed and possible solutions proposed. The structure of the program is described in moderate detail. The program is written in a style which makes additions or modifications easy to implement. (Author).*

*Marketing for Entrepreneurs* Jurgen Wolff 2012-12-27 Entrepreneurs are great at coming up with new ideas and, often by sheer passion alone, getting their business started. But for long-term success they must be aware of the secrets of marketing. Even if they don't always market their product themselves, they need to understand the processes enough to ensure that the job is being done well. The book identifies marketing as the entire process of researching, creating, distributing and selling the product or service. It isn't about theory and metrics; instead, it's a practical guide that starts with the basis of all marketing: the proper mindset. The book: de-mystifies branding, showing how it is never a process undertaken for its own sake (or for creating sexy brochures or websites), but in order to burn the uniqueness of the business into the minds of customers. offers an extensive toolkit that includes the power of outsourcing and networking and the latest techniques in establishing rapport, communicating with the use of questions, and the power of language patterns in speech and written copy. shows how to use both new and old media to best effect, with special attention to blogs, podcasts, viral videos, and social networking sites. shows how to put all of these elements together into a marketing master plan that you can formulate a one-year plan and then break down into a six-month, three month, and one month segments.
